DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: "223" of Figure 12C. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The drawings are objected to because of the following: 1) "65" of Figure 3B should be changed to "60"; 2) in Figure 10B, the line extending from "188" should be extended about 5 mm higher to contact the mixture itself rather than the container; and 3) in Figure 12C, "195" should be changed to "198" (vacuum, rather than valve). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version

Art Unit: 1725

of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The abstract of the disclosure is objected to because "comprises" should be changed to "includes" in the 2nd line. Correction is required. See MPEP § 608.01(b).

4. The disclosure is objected to because of the following informalities:

On page 9, 1st line of paragraph [34], "FIG. 2" should be changed to --FIG. 2A --.

On page 19, 2nd line of paragraph [85], "95 and 98" should be changed to --97 and 100--.

On page 27, 1st line of paragraph [112], "185" should be changed to --182--.

On page 32, 5th line of paragraph [133], "282" should be changed to --292--.

On page 34, 4th line of paragraph [139], "227" should be changed to --327--.

Appropriate correction is required.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 27-34 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-22 of U.S. Patent No. 6,398,992 and claims 1-34 of U.S. Patent No. 6,780,352. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed disclosures of the fabrication methods of US 6,398,992 and US 6,780,352 share common features with the fabrication method of claims 27-34 of the present application. One of ordinary skill in the art would have recognized that the state-changeable coating (liquid/carrier film) on the substantially close-packed solid bodies in the claims of the present application would have an adhesive state and a non-adhesive state, depending on the presence (enabling non-adhesiveness) or absence (enabling

adhesiveness) of the liquid/carrier components set forth in US 6,398,992 and US 6,780,352, such that the desired state (selectively formable or force-resisting) is obtained.

Claim Rejections - 35 USC § 112

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 32-34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With regard to claim 32, it is unclear what is meant by the limitation "defined by that portion of the material that is located within a particular distance". How is the distance related to the coating of the solid bodies?
